

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

2:14:46 PM

Solar power should be encouraged and supported in Australia along with other environmentally friendly ways of generating power, one of the best way to encourage and support alternative power is to pay the providers small or large adequate feed in tariffs, this will further encourage the uptake of solar systems similar to the examples set in Germany.
