SOLAR FEED-IN TARIFFS 2017/18

Friday, 12 May 2017

5:32:59 PM

Having paid over \$11000 for solar equipment 7 years ago, I support a fair price for solar. Also to encourage people to put panels on new houses.

The feed-in tariff should increase in line with the wholesale price of electricity.

The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum.

The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar
