

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Monday, 22 May 2017

9:28:49 AM

I support a fair price on solar. We are at a critical time at this time, and everything we can do to promote renewable energy is crucial.

So I would like to make a number of points to IPART in support of the proposed increase in the solar feed-in tariff:

1. The feed-in tariff should increase in line with the wholesale price of electricity
2. To be effective it should not be a benchmark range, but rather be regulated so it is offered by retailers as a minimum
3. We need to value solar properly - there are innumerable environmental and health benefits of rooftop solar and this should be recognised in the value of solar via the feed-in tariff

I am part of a building wanting to include solar, not just for our own benefit but because we want to make a difference to the what we are doing. This is a clear and good way to make a difference. It will be difficult to convince everyone in our rather large building without a fair feed-in tariff.

Regards
Lyndall
