SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
12:35:51 PM

The Independent Pricing and Regulatory Tribunal (IPART) has proposed to more than double the NSW solar feed-in tariff benchmark to 11.6-14.6c per kWh in line with the increased wholesale price of electricity.

Good one.

I support a fair price for solar;

The feed-in tariff should increase in line with the wholesale price of electricity;

The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum;

The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar.

The sooner we move to a non-carbon energy economy the better for our planet.
