

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017

3:46:35 PM

I have supported Solar since 2013, I could not have cells before as the house did not exist, once I had a roof I put on the solar and used this energy to offset the energy used in the build.

I decided not to get batteries but to be grid connected and pay the Supply charge, I have been receiving 6 Cents a KW but could be paying 52 cents for energy I use, I have chosen to have 100 % green energy and I built my house to save energy, and the Devices I use in the house, I don't think it is fare I only receive a low amount when the Supply company, is reselling it for over 50 Cents to my neighbors

If we are to pay a high price for early adopters then we should receive a fair return , as we support the other power users Thanks

Laurence
