**SOLAR FEED-IN TARIFFS 2017/18**

5:28:39 PM

My wife and I support the fair price for solar, we have just installed rooftop solar we work through the day and will not get good benefits until we retire, until then we are being ripped off with the pathetic 6c kw and have to buy back our power we generated at nearly 30c kw, after all we did pay \$11,000 for the system, we need a fair set price for our solar, I am sure it would be illegal with the banks, that for every 30c you banked the gave you 6c back.

Not happy
