Submission: "Minister,

There is NO justification for reducing our feed-in tariffs to increase the income of the various large companies. We supply cheap electricity to the grid which the companies sell at a premium - and you want us to claim less?

If you and IPART had any sense you would encourage more households to get solar and reduce the need for coal and fracking.

The greed and stupidity of this Government is would be unbelievable if it wasn't that this Government does not believe in benefiting its electorate. So, if you want to move into the 21st century, may I suggest you pay households that generate power money that they are entitled to and that is more than 11 cents per Kw"
