

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
10:51:47 AM

We need a fair price for not only a return on our financial investment but also the investment in cleaner living.

We need more incentive for all Australians to want to install solar, this boosts the economy in all levels of business including R&D. This is employment, profits and investment here....in Australia, you know, the country WE live in. The Australian manufacturing industry has been decimated by the elected representatives, if manufacturing was such a burden on the Australian economy, why are all the other countries picking it up?

Hold to account the policy makers and ensure they resist the temptation to omit the real reasons why the FIT has been cut and why they no longer support solar progress.

Have the conversation, ask the difficult questions, expect the full, open and honest responses.
