SOLAR FEED-IN TARIFFS 2017/18

Sunday, 14 May 2017

5:50:27 PM

I support an increased price for feed-in tariffs.

It should be in line with wholesale prices of electricity and it should be strictly regulated not left to the energy suppliers whims.

We the providers of solar carry the installation costs and maintenance costs to provide this renewable energy and this cost to us needs to be considered.
