Submission: I object to any permission being granted to discharge effluent - regardless of the level of its treatment - into the lagoon at the Southern end of Catherine Hill Bay beach. The lagoon is in a sensitive coastal area and within the zone of the Heritage village. The new development at the southern end of Catherine Hill Bay has already begun to exert negative impacts on the traffic, social, heritage and environmental values of the existing village and its surrounds, and the application to discharge sewerage effluent into a lagoon that flows over the beach where children play is unacceptable.
