SOLAR FEED-IN TARIFFS 2017/18

Wednesday, 10 May 2017

4:14:14 PM

I am writing to confirm that I agree that NSW needs a fair pricing for rooftop Solar.

The feed-in tariff should increase in line with the wholesale price of electricity; & be regulated so retailers have to offer it as a minimum. The feed-in tariff needs to recognise the environmental; health and network benefits of rooftop solar; and represent the true value of roof top solar.
