**SOLAR FEED-IN TARIFFS 2017/18**

**Saturday, 20 May 2017**

9:30:02 AM

we pay out huge amounts of money to help the environment and having a reasonable payback is certainly not too much to expect instead of the provider making money out of our investment. Electricity prices are going up but we get very little back. The feed-in tariff should represent the true value of solar. It is time people stood up to the companies ripping them up. It is time to give the people who have outlaid the money a fair price.
