SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

12:41:04 PM

Solar feed in should be at least a fair price rather than the ripoff price it is now, electrical distribution company's bottom line is \$'s, the environmental impact is enormous from solar, eg we have panels & 7kw battery system since January 17 we have saved 467kg of carbon dioxide and saved 12 trees that is in a very short period of time and one house, imagine thousands so in conclusion retailers should be regulated so they have to offer asit a minimum
