

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

8:36:05 PM

A lower price would b gratefully accepted for Solar please. Now that the higher subsidy for those of us who put solar power in when the govt was urging us to do so, the present subsidy is pitiful. Obviously the govt was able to manage when giving out the higher subsidy, so what is the problem now. Encourage more people to use solar energy. Give a higher subsidy please. The fossil fuel energy is produced in very old dilapidated power plants and there's no money to build new ones. They wouldn't be required for many years, as alternate energy is becoming more popular than ever. Those of us with solar panels because of your incentives a few years ago, would be grateful for lower prices, and we are also doing our share to try and meet our targets in reduced carbon emissions. Thank you.
