**SOLAR FEED-IN TARIFFS 2017/18**

**Friday, 19 May 2017**

3:11:31 PM

Apart from all the obvious benefits that solar brings it will end up being a political imperative. Eventually when solar is the norm and with rising costs of electricity voters will just vote for whatever party offers the best price. Relying on the private sector to keep prices down is an abject joke amongst the populace. People will take the situation into their own hands
