**SOLAR FEED-IN TARIFFS 2017/18**

**Friday, 19 May 2017**  
12:06:29 PM

I support a fair price for solar. The feed-in tariff should increase in line with the wholesale price of electricity. This will make more people want to take part in the renewable energy revolution that is happening all over the world.

The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum.

The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar.

The rest of the world is way ahead of us in uptake of solar energy production and a cleaner environment pollution wise.

The solar renewables sector is where the jobs and future growth is world wide. Why not be part of this here in NSW and lead Australia into a brighter future.
