**SOLAR FEED-IN TARIFFS 2017/18**

**Tuesday, 9 May 2017**  
8:25:33 PM

All rooftops should have solar systems linking into a community system with battery storage. I find it intolerable that I produce more solar electricity than I need but can only sell it back for 4c per kWh. This is appalling.

The feed-in tariff should be in line with the wholesale price of electricity. It should be the same regardless of my electricity provider.

I am a great believer in renewable energy sources and have had solar systems on my house(s) for the last 14 years.

Let's do something about these issues.

Come on Australia.
