

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

12:37:29 PM

Transitioning to renewable is a necessary step and needs to be implemented across the board on individual houses and larger installations. The local supply of solar power helps the larger systems, and a fair price should be placed on the power produced on this developing industry. A fairer price will attract more installations and therefor help the whole system.
