**SOLAR FEED-IN TARIFFS 2017/18**

**Friday, 19 May 2017**  
12:19:19 PM

I spent a considerable amount of money to purchase my solar panels and now I get virtually no value from them at all without an adequate feed-in tariff. Therefore I support a fair price for solar, the feed-in tariff should increase in line with the wholesale price of electricity, the feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum, the feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar.
