Date of submission: Monday, 7 May 2018

Submission: "Dear IPART, as a solar panel owner I find the feed in tariff is rather low already without reducing it further. The electricity producing infrastructure that I now have on my roof was not paid for by any third party and no power company has to maintain it.

I think a higher reward for those who are contributing to clean energy production should be looked at, not the opposite.

Kind Regards,
M. Lowerson."
