Submission: "All I'm asking is a fair price for the solar power my system provides to the grid. I believe it is in the best interests of all power consumers in NSW that rooftop solar power generation is encouraged by a fair feed-in tariff. It's not fair to punish solar owners who are helping bring down the price of electricity for all NSW energy users.

Last year more than half of the retailers in NSW failed to offer a feed-in tariff within the benchmark range. The feed-in tariff needs to be regulated and mandated so that the retailers have to offer it as a minimum.

The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar. I work from home and make use of the solar power generated by my modest solar system which lightens my footprint on the environment while saving costs."
