

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017
11:25:12 AM

Solar a sustainable power source.

Solar has so many environmental and health benefits for our country that it is a no brainer. Fossil fuels need to be drastically reduced to minimise climate change. Solar is an intricate part of achieving this.

This is very important to myself and my family.

I urge Ipart to set a fair pricing structure in place for households producing solar. Furthermore it should increase in line with the wholesale price of electricity. It should also be regulated as a minimum price so retailers reimburse us for our clean energy.
