**SOLAR FEED-IN TARIFFS 2017/18**

**Friday, 19 May 2017**

4:31:43 PM

As solar panel owners for the past 6 years we have enjoyed the 60cents/kWh that was promised until 2016. Now we are getting 6c/kWh which is hardly the true value of the energy we are putting back into the grid. The feed in tariff should be regulated so retailers must offer a good minimum price and should increase in line with the wholesale price of electricity.

A fair price for solar is the FAIR thing to do.
