SOLAR FEED-IN TARIFFS 2017/18

**Wednesday, 10 May 2017**  
6:57:37 PM

I write to urge a review of pricing of the feed in tariff for solar power. 3 years ago we fitted a 3Kw rooftop system in order to utilise the long hours of Australian sunshine to pay for our daytime use of power and feed extra into the grid. I believe there should be a fair price for solar generated in this way taking into account the environmental and health benefits. Please legislate that retailers review and link this to the increased cost of electricity. Margaret Ogden
