

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017
11:55:31 AM

I request IPART to support a fair and transparent price for solar generation as represented by the feed-in tariff from rooftop solar arrays.
The tariff should be linked to the wholesale price of electricity as a minimum and be a true value reflecting the environmental, health and network benefits.
Please see your way clear to make rooftop electricity generation a household responsibility for the betterment of our society.
