**SOLAR FEED-IN TARIFFS 2017/18**

**Tuesday, 9 May 2017**  
2:53:30 PM

If power companies were truly genuine in moving away from coal power as some advertise, they would be showing true commitment if they paid a fair feed in tariff.

I therefore support a fair price for solar;

The feed-in tariff should increase in line with the wholesale price of electricity;

The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum;

The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar

Regards

MICHAEL Radburn
