

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

8:49:41 PM

Power companies have enjoyed increase in supply at the consumers cost. Its time they paid for it, back to those who have invested, the little people. Mums and dads. It is now to the point that new solar installations are not viable and the standard install does nothing to benefit those who have invested in there own power.
