Submission: "I strongly support a fair price for rooftop solar and oppose any proposal to actually lower the price offered by energy retailers, the FiT. Last year more than half of the retailers in NSW failed to offer a FiT within the benchmark range. The FiT needs to be regulated and mandated so that the retailers have to offer it as a minimum; it is not fair to punish solar owners who are helping bring down the price of electricity for all NSW energy users.

The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar."
