

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
12:13:15 PM

1. I strongly support the proposed IPART increase to the NSW solar feed-in tariff to 14.c per kWh so it at least reflects the increased wholesale price of electricity.
2. The feed-in tariff should be regulated so the electricity retailers have to offer it as a minimum.
3. At present my retailer is paying me paying 8.2.c kWh for my solar feed-in and on selling it for 31.c per kWh. They are making over 200% profit.
4. The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar
