**SOLAR FEED-IN TARIFFS 2017/18**

**Friday, 19 May 2017**

1:32:07 PM

we have solar panels on our roof and I support a fair price for solar which reflects the price that the energy Companies pay for the electricity they sell to us. surely that is fair to all.

The feed-in tariff should increase in line with the wholesale price of electricity;  
The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum;  
The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar;  
and  
any personal examples about your solar systems and experiences with the feed-in tariff
