SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

1:17:45 PM

I support a fair price for solar energy; hence the feed-in tariff should increase in line with the wholesale price of electricity. The tariff should reflect the fact that solar energy has environmental and health benefits, unlike old forms of energy.

I support IPART's proposal to double the feed-in tariff.
