**SOLAR FEED-IN TARIFFS 2017/18**

**Tuesday, 9 May 2017**  
4:36:04 PM

I believe that the voluntary benchmark tariff should be made mandatory, so power companies are bound by the new, fairer rates. I support a fair price for solar; the feed-in tariff should increase in line with the wholesale price of electricity; the feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum; the feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar; we are doing our part for the environment but if there is not a decent feed-in tariff for solar, the energy companies make a profit out of us which is unfair
