SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017
11:23:16 AM

The solar feed-in tariff should be the same as the wholesale price for power. There is no logic or fairness behind paying providers of solar power less per kWh than every other energy provider. People with solar and batteries are making your job easier and helping save the planet. Treating them less fairly than Big Coal or Big Gas is morally and economically indefensible.
