**SOLAR FEED-IN TARIFFS 2017/18**

**Tuesday, 9 May 2017**  
7:50:35 PM

I support a fairer price for my home generated solar energy. The feed in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar.

I have a 5 kwh roof top system which on average, feeds 20 kwh per day into the system for the use of my neighbours who pay retail rates for it of 20 to 40c per kwh while I am paid 7.2c per kwh for it.

Should the neighbours opt for the green energy option they are charged even more, while I am supplying green energy for a pittance.
