SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017
11:36:49 AM

I write to state my full support for a fair price for the solar power I generate and contribute to the grid from the infrastructure I invested in. Such a price would increase in line with the wholesale price of electricity and should be regulated so retailers have to offer it as a fair minimum. It should recognize the environmental, health and network benefits of my rooftop array.
