SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
4:16:29 PM

I am writing to ask for a fair price for solar. I have spent approximately \$10,000 installing my solar PV and solar hot water systems. The feed-in-tariff should represent the true value of solar. Which includes not just the investment we make as independent consumers, but the inherent value to the environment and other social benefits. This is the only way you can encourage more people to invest in renewable energy, which is obviously how we should transition as a Nation. I am writing to state that I support a fair price for solar and that I wish to see it increase with the price for electricity. It is grossly unfair that in NSW we are getting only around \$0.06 for a KWH of solar when the price of electricity at the peak is about 5 times that!
