SOLAR FEED-IN TARIFFS 2017/18

Wednesday, 10 May 2017
9:33:17 AM

I fully support a fair price for solar;
I am a strong believer that feed-in tariffs should increase in line with the wholesale price of electricity;
That the feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum;
And that the feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar; and
any personal examples about your solar systems and experiences with the feed-in tariff.

Paul Aitken
