**SOLAR FEED-IN TARIFFS 2017/18**

I Support a fair price for solar.

The feed-in tariff should increase in line with the wholesale price of electricity.  
The feed-in tariff should not just be a benchmark range, it should be regulated so  
retailers have to offer it as a minimum.

I invested \$15,000 installing solar panels and I want a fair price for the electricity  
I'm putting back into the system as a result of my investment.
