

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017
11:23:05 AM

My plea to government is that there is a fair price for solar and that government supports the development of this resource. It seems absurd that solar is bought for a fraction of the price which it is sold to consumers. There is an opportunity for government to demonstrate an understanding of the importance of this renewable and to encourage its use. The economy, environment and our future are at stake. Please don't mess this up.

All good wishes,

Prof Ed Davis
