

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

3:03:19 PM

We are happy to do our bit for the environment by having 5.7kW of solar panels. If we received a better tariff we might be able to afford a battery. The current tariff really is a piddling insult, while the charges are unconscionable.
