SOLAR FEED-IN TARIFFS 2017/18

I feel that there should be a fair price for solar energy fed back to support the power grid buy solar customers.

The feed-in tariff should increase in line with the wholesale price of electricity;

The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum;

The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar.
