

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

1:00:32 PM

We thank the iPART for reconsidering the request to raise the rates for the Feed-in Tariff. Our appreciations!!

We have had a good return on our investment over the past six years but it was nowhere near the amount we spent. The ROI was enough to keep us interested but when the 6yr period ran out, we know that there is still so much we lack.

The real estate on our roof is being used for supplying to the National Grid. The capital that I have invested in is not being repaid. This is not fair.

The iPART has reconsidered and proposed an optional raise to the feed-in-tariff.

We thank you for that. But we really need that to be the basic norm and not an optional. The electricity prices have soared and we have to pay extra for the land-value that also has increased. The phones and water and gas has increased along with the electricity. The salaries have levelled out and we are unable to justify costs anymore.

We would appreciate the standardisation of rates for FiTariffs in proportion to the rise in electricity prices.

We do hope that you will make our voluntary contribution to green energy and our national grid - something to be proud about and not leave us with a huge bill and bad taste in our mouths.

Philip Immaraj
