Submission: "This is becoming a regular chore fending off state and federal government attacks on renewable energy. While our state gov' continually attacks those of us who are part of the solution and have made a commitment to the shift to the new economy and here we go yet again.....? One can only assume that it has more to do with pandering to the coal, gas and mining lobbyists and their donations and perks lavishly applied to our political leaders!

Please take note of these following points:-

* You are seeking to punish people including Pensioners who have spent their hard earned money to alleviate the ever-rising costs of power brought on by systemic and culpable mismanagement of our power system by government.

* It's not fair to punish solar owners who are helping bring down the price of electricity for all NSW energy users;

*Last year more than half of the retailers in NSW failed to offer a FiT within the benchmark range. The FiT needs to be regulated and mandated so that the retailers have to offer it as a minimum;

*The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar.."
