

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Monday, 22 May 2017

12:33:38 PM

I am writing this submission to ask that you address the inequity that is the current feed in tariff it offers power paid for by the owner of rooftop solar to the power companies for a fraction of the cost they would pay elsewhere. The feed-in tariff should increase in line with the wholesale price of electricity. It should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum.

The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar.
