SOLAR FEED-IN TARIFFS 2017/18

Saturday, 20 May 2017

8:05:08 PM

As a citizen of Australia and having in good faith invested near ten thousand dollars in solar when the then current Federal Government actually made a decision to reduce the levels of greenhouse gas emissions. I find the present feedin tariffs a betrayal by the current government allowing the power corporations literally have the front seat in setting this absurdly low feedin tariff. It should be on a one to one ratio and further the daily connection fee should be treated as a business expense for the owners of solar and other generation systems.

Yours respectfully

Peter Kash
