SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017
11:21:17 AM

I support a fair price on solar - the current pricing I do not consider to be fair. The feed in tariff should increase in line with the wholesale price of electricity and this should be regulated. The current return on my solar system is now so low if it broke it would not be cost effective to repair and I would shut it down - this benefits no one. The feed in tariff should represent the true value of solar.
