SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
6:12:55 PM

Congratulations to IPART for proposing a fair solar price. It's the only fair way to go for those of us who've invested in solar energy but have stayed connected to the grid. It's only common sense that the feed-in tariff should reflect the true value of solar energy for its energy content, social and environmental value. The tariff should also be regulated to avoid exploitation by electricity retailers. Governments should be doing much more to encourage large-scale renewable energy generation to help slow down global warming.
