SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
1:51:23 PM

The solar feed-in price should be much closer to the supply tariff, even the off-peak rate offered by the energy retailers. We already pay a line rental of approx. \$1 per day, which should cover the maintenance costs of the electricity grid.

Our solar input should have the effect of reducing the costs of generation and supply and the minimum rate of payment to solar owners should be increased significantly above 6 cents per kWh and be fixed by the government.
