SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

4:52:54 PM

My current feed in tariff is 8.1c/kWh. Peak power costs me over 25c. A fairer deal would be good. Also my power company Powershop charges me two separate supply fees for peak power and controlled load 2. Another blatant profit maker. Powershop does not generate 1kilowatt of energy but they are earning a substantial profit from the sale of other people's power, including my solar power. Why?

Sincerely

Peter Phillips
