**SOLAR FEED-IN TARIFFS 2017/18**

**Wednesday, 10 May 2017**

4:40:12 PM

I support a fair price for solar;

The feed-in tariff should increase in line with the wholesale price of electricity;  
The feed-in tariff should not just be a benchmark range, it should be regulated so  
retailers have to offer it as a minimum;

The feed-in tariff should represent the true value of solar, this means recognizing  
the environmental and health benefits and the network benefits of rooftop solar.

Personally I had the best of interventions when installing solar panels, however  
Im not being being treated as well as one could by energy companies that are  
taking my energy and paying virtually nothing for while I contribute to the grid  
....please fix this.
